RESPONSE TO ELECTION OF SPECIES REQUIREMENT

Box Non-Fee Amendment
Commissioner for Patents
Washington, D.C. 20231

Dear Sir:

This communication is in response to the Election of Species Requirement of August 8, 2002, a response to which is due on or before September 8, 2002.

RECEIVED
AUG 29 2002
TECHNOLOGY CENTER 2800

Election of Species Requirement

The Election of Species Requirement of August 8, 2002, in the above-referenced application has been received and reviewed.

The Election of Species Requirement does not explicitly identify any species of invention, but merely provides that the “patentably distinct species of the claims invention” include “[a]ny of the species in figures 1 to 12.”

Claims 1-67, which are currently under consideration in the above-referenced application, are drawn to a semiconductor device for use in a stacked multi-chip assembly (claims 1-18), a semiconductor device assembly (claims 19-44), a multi-chip module (claims 45-67).

Many of FIGs. 1-12 of the above-referenced application, including FIGs. 5, 6A-6D, 7A-7D, and 8, depict methods for fabricating the semiconductor devices and, therefore, are not species of invention that apply to the claims that are currently under consideration.

With respect to the remaining figures, it is respectfully submitted that the following species of invention are shown:

Species 1, shown in FIGs. 1 and 2: semiconductor devices with spacers on active surfaces thereof;

Species 2, depicted in FIG. 3: semiconductor devices with spacers on back sides thereof;

Species 3, illustrated in FIG. 4: semiconductor devices with spacers on both the active surfaces and back sides thereof;

Species 4, shown in FIGs. 9 and 11: assemblies of semiconductor devices in stacked arrangement, with bond pads of each lower semiconductor device exposed laterally beyond the spacers that are on a surface of the semiconductor device;

Species 5, shown in FIGs. 9A and 9B: assemblies of semiconductor devices in stacked arrangement, with spacers formed over intermediate conductive elements extending from bond pads of a lower one of the semiconductor devices;

Species 6, shown in FIG. 9C: assemblies of semiconductor devices in stacked arrangement with leads electrically connected to bond pads of at least a lower one of the semiconductor devices;

Species 7, shown in FIG. 10: assemblies of semiconductor devices in stacked arrangement with spacers on the bottom of an upper one of the semiconductor devices and spacers on the active surface of the next-lower semiconductor device abutting one another; and

Species 8, illustrated in FIG. 12: packages that include stacked assemblies.

It is respectfully submitted that claims 1-13, 14, 17, and 18 read on Species 1, that claims 1-13, 15, 17, and 18 read on Species 2, and that claims 1-13, 16, 17, and 18 read on Species 3. It is, therefore, respectfully submitted that claims 1-13, 17, and 18 are generic to each of Species 1, 2, and 3.

It is also respectfully submitted that claims 19-40 and 41 read on Species 4, that claims 19-40 read on Species 5, that claims 19-40 also read on Species 6, claims 19-40 and 42-44 read on Species 7, and that claims 19-40 and 45-67 read on Species 8. It is, therefore, respectfully submitted that claims 19-40 are generic to each of species 4, 5, 6, 7, and 8.

As the assemblies and packages of Species 4-8 also include semiconductor devices of the types recited in claims 1-13, 17, and 18, it is also submitted that, in addition to being generic to Species 1, 2, and 3, each of claims 1-13, 17, and 18 also read on and are generic to each of Species 4-8.

An election is hereby made, without traverse, to prosecute the invention of Species 7, on which at least claims 1-13, 17, 18, 19-40, and 42-44 read.

Nonetheless, as it is believed that claims 1-13, 17, and 18 are generic to each of the above-identified species, it is respectfully submitted that all of claims 1-67 should remain under consideration in the above-referenced application.

Information Disclosure Statement

Please note that an Information Disclosure Statement was filed in the above-referenced application on August 24, 2001, but that an initialed copy of the PTO-1449 that accompanied that Information Disclosure Statement has not yet been returned to the undersigned attorney. It is respectfully requested that the information cited in the Information Disclosure Statement and listed on the accompanying PTO-1449 be considered and made of record in the above-referenced application and that an initialed copy of the PTO-1449 evidencing the same be returned to the undersigned attorney.

Following consideration of the referenced cited in the Information Disclosure Statement and of this Response, an early action on the merits is respectfully requested.

Respectfully submitted,

Brick G. Power
